*What is the best camera?* The one that's always with you! It's one thing to use the iPhone, Smart Phone or iPad for occasional snapshots and quite another to explore the wondrous possibilities of mobile photography.

In this popular class, with professional educator and mobile photography expert, Jerry Hug, you will learn how to take better photographs, and how to edit them—without a computer—to make spectacular images that set your photos apart from the casual mobile photographer. You'll learn how to store your images, as well as how to share them around the world. Plus, you'll learn the best ways to make great prints from your device. This is a fun class for every mobile photographer who is serious about creating beautiful digital images from their snapshots of family, friends and travel, in those special moments that happen everyday.

Students must bring their iPhone, Smart Phone, or iPad.

Please download and install the free "Snapseed" photo editing app prior to class.
