Compare Text Alerts vs Free App

Text Alerts

You receive an alert everytime the status is changed, even when you are not interested in it.

Text alerts are limited to 140 characters so you may not get all the details and have to check via another method.

Text alerts can not play the audio of any status detail messages recorded over the phone.

We can not guarantee delivery of text messages. Many carriers filter messages and/or delay delivery.

Text can work for any phone that has text capabilities.

Free Mobile App

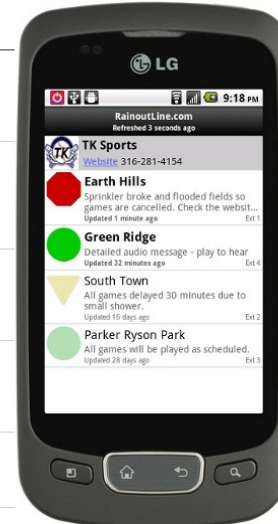

You check the status only when you need to know, or quickly enable/disable push notifications.

App shows all info.

The app can play audio.

The app updates in real-time.

The app works for anyone that has an Android or Apple mobile device.

If you would still like to set up email or text alerts, click the appropriate tab above.

The app can be downloaded from:

Do you have an Android or iPhone mobile device? If yes, we recommend downloading the free RainoutLine.com app from the app market/store instead of signing up for email alerts. The app gives the benefit of quickly checking the status whenever you need to know as opposed to alerts that are sent everytime the status is updated.

1 Enter the email address to subscribe.

2 When would you like to stop receiving alerts? In 1 year

Do you have an Android or iPhone mobile device? If yes, we recommend downloading the free RainoutLine.com app from the app store instead of signing up for text alerts. The app makes it easier to enable and disable alerts without having to go through the process of verifying your phone number. Also, text alerts are limited to 140 characters so you might not see the whole status detail and text alerts can not play audio messages. The app does not have these limitations.

1 Enter the phone number to subscribe.
